Journal of Hydrology 170 (1995) 297

Journal of Hydrology

Contents

Research Papers

A comparison of evapotranspiration above a barley field based on quality tested Bowen ratio data and Deardorff modelling
S. Tattari, J.-P. Ikonen and Y. Sucksdorff 1
Seasonal expansion and contraction of stream networks in shallow groundwater systems
J.J. de Vries 15
An evaluation of flow-stratified sampling for estimating suspended sediment loads
R.B. Thomas and J. Lewis 27
Intensifying groundwater acidification at Birkenes, southern Norway
P. de Caritat 47
Recent lake-level and outflow variations at Lake Viljandi, Estonia: validation of a coupled lake–catchment modelling scheme for climate change studies
J. Vassilijev, S.P. Harrison and A. Haxeltine 63
Estimating sparse forest rainfall interception with an analytical model
J.H.C. Gash, C.R. Lloyd and G. Lachaud 79
Acid–base status of soils in groundwater discharge zones – relation to surface water acidification
A.C. Norrström 87
An acidification model (MAGIC) with organic acids evaluated using whole-catchment manipulations in Norway
B.J. Cosby, R.F. Wright and E. Gjessing 101
The impact of land use change on water resources in sub-Suharan Africa: a modelling study of Lake Malawi
I.R. Calder, R.L. Hall, H.G. Bastable, H.M. Gunston, O. Shela, A. Chirwa and R. Kafundu. 123
Seasonal cycles of dissolved constituents in streamwater in two forested catchments in the mid-Atlantic region of the eastern USA
K.C. Rice and O.P. Bricker 137
Contrasts in storm event hydrochemistry in an acidic afforested catchment in upland Wales
C. Soulsby 159
Effective parameters for flow in saturated heterogeneous porous media
C.V. Chrysikopoulos 181
1-D, 2-D, and 3-D analytical solutions of unsaturated flow in groundwater
F.T. Tracy 199
Non-dimensionalisation of the Penman–Monteith model
C. Huntingford 215
Seasonal soil water storage changes beneath central Amazonian rainforest and pasture
M.G. Hodnett, L. Pimentel da Silva, H.R. da Rocha and R. Cruz Senna 233
Water flow path interactions with soil hydraulic properties in till soil at Gårdsjön, Sweden
L. Nyberg 255
Monthly water balance of ungauged catchments obtained by geographical regionalization
G.L. Vandewiele and A. Elias 277

Book Reviews

Statistical Modeling in Hydrology, by R.T. Clarke–C.T. Haan 293
The Fresh Waters of Scotland, A National Resource of International Significance, by P.S. Maitland, P.J. Boon and D.S. McLusky–I.R. Calder 294
